73rd Annual Meeting

North Central Weed Science Society

December 3 - 6, 2018

Hyatt Regency Milwaukee, WI

President's Welcome

2018 North Central Weed Science Society Meeting

Welcome to the 73rd annual North Central Weed Science Society meeting at the Hyatt Regency in Milwaukee, WI. Since attending my first NCWSS meeting in 1994, I have found this meeting to be one of the most important that I attend every year. This event provides an important venue for those involved in weed science to discuss the latest research, education, and outreach activities in the North Central Region and beyond. This meeting also provides a great opportunity to learn new techniques, share information and experiences, and to catch up with old and new friends. I hope you find this meeting as important to your year as I do and I look forward to visiting with many of you soon.

Richard Proost, Tim Trower, and the Local Arrangements Committee have done an excellent job of preparing the hotel for our meeting. Our experiences with the Hyatt Regency Milwaukee in the past have been excellent and I anticipate that it will continue to be a high-quality venue with exceptional service. Milwaukee is a great city for our meeting with diverse restaurants, exciting nightlife and many local attractions.

Program Chair, Aaron Hager, has assembled an excellent program. In addition to our regular slate of outstanding poster and paper presentations, there will be four symposia available for participants to attend. *"Essential Communication in Weed Science: Within and Beyond our Society"* and *"Atmospheric Conditions for Making On-Target Herbicide Applications"* are half-day symposia that have excellent groups of presenters and experts both within and outside of the weed science community. This year's graduate student symposium, *"Making Data Meaningful: A Guide to Presenting Data at Scientific Meetings"* will provide participants the opportunity to have one-on-one conversations with each speaker during "roundtable rotations" partway through the symposium. Students are encouraged to bring a copy of the statistics used during their poster or paper presentations that could serve as a discussion starter at the roundtable. The final symposium this year will be the ever popular "What's New in Industry" following the industry breakfast on Thursday morning. This symposium will highlight new products and technologies from our industry partners for the 2019 season. To aid in planning your meeting schedule this year, we will once again have the Guidebook App available in addition to the program booklet. These two resources will help enhance your meeting experience and ensure that you don't miss any of these excellent sessions.

I am excited that Anita Dille will be organizing the 5th 'Women in Weed Science' Networking Breakfast. This event provides a great opportunity for the women of our society to meet and learn more about opportunities in weed science. This year's industry breakfast will feature Ms. Janice Person, the Online Engagement Director at Bayer CropSciences. Ms. Pearson is instrumental in developing social media programs encouraging employees to have one-on-one discussions with non-agricultural people regarding food safety and environmental concerns. The Industry breakfast is open to all attendees at the meeting, and tickets for the event can still be purchased on site.

The winners for the Graduate Student Paper and Graduate and Undergraduate Poster Contests will be announced at our Society Social on Wednesday night. Please plan on attending and help us congratulate our NCWSS students. The success of the NCWSS depends on your active participation through attendance and presentations as well as through your service on committees or as an office holder. Every committee of the society will meet during the conference. Please feel free to attend any of the committee meetings that interest you, and please volunteer to serve. Both you and the society will benefit from your involvement.

It has been a great privilege to serve you as President of the NCWSS. I believe that together we will make significant contributions to weed science and to the NCWSS. If you have suggestions on how NCWSS can serve you better, please let me know. I look forward to seeing you in Milwaukee.

Christy Sprague, President
